

Colloid & Polymer Science

Kolloid-Zeitschrift und Zeitschrift für Polymere
Official Journal of the Kolloid-Gesellschaft
Founded by Wolfgang Ostwald 1907,
continued by F. H. Müller, Marburg 1944-1981

Editors:

Prof. Dr. H.-G. Kilian, Abt. für Experimentelle Physik, Universität Ulm, Oberer Eselsberg, D-7900 Ulm
Prof. Dr. A. Weiss, Institut für Anorganische Chemie, Universität München, Meiserstr. 1, D-8000 München 2

Regional Editors:

Prof. Dr. B. Lindman, Physical Chemistry 1, Chemical Center, Lund University, P.O.B. 740, S-220 07
Prof. Dr. E. Matijević, Institute of Colloid and Surface Science, Clarkson College of Technology, Potsdam N. Y. 13676 (USA)
Prof. Dr. M. Nakagaki, Faculty of Pharmaceutical Sciences, Kyoto University, Sakyo-Ku, Kyoto (Japan)
Prof. Dr. R. H. Ottewill, School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS (England)

Editorial Board:

E. W. Fischer-Mainz	J. Lyklema-Wageningen
R. Hosemann-Berlin/West	W. Pechhold-Ulm
H. H. G. Jellinek-Potsdam, N. Y.	A. Peterlin-Washington
G. Kanig-Ludwigshafen	G. Rehage-Clausthal-Zellerfeld
A. Keller-Bristol	H. Ringsdorf-Mainz
J. Koppelman-Leoben	A. Scheludko-Sofia
P. Kratochvil-Prag	E. Wolfram-Budapest
H. Lange-Düsseldorf	H. Zahn-Aachen

Volume 261 (1983)

Steinkopff Darmstadt

CONTENTS OF VOL. 261 (1983)

Polymer Science

Acierno, D., E. Calderato, L. Napoli, and G. Spadaro: The effect of the composition on the properties of γ -irradiated ethylene-vinyl alcohol copolymers. I Solubility and calorimetric results	121
Ahmad, N., M. Kaleem, and S. Noor: Micellization of styrene/butadiene/styrene block copolymers in mixed solvents	898
Annighöfer, F. and W. Gronski: Blockpolymers of styrene and isoprene with variable interphase: Morphology and dynamic viscoelastic behaviour	15
Bandara, U. and M. Dröscher: The two-phase structure of segmented block copoly(ether ester)	26
Bataille, P. et F. Granger: Copolymerisation alternee du methacrylate de méthyle et du styrene complexes par du Chlorure de Zinc en milieu aqueux. I. Etude du rendement de la reaction	914
de Boer, J. and A. J. Pennings: The effect of pendant chains on the elasticity behaviour of polyethylene networks	750
Brämer, R., Ch. Gerdes, and W. Wenig: Analysis of the small-angle X-ray scattering of linear polyethylene by a paracrystalline lattice model	293
Busico, V., P. Cernicchiaro, A. Scopa, and M. Vacatello: Structural organization of polar-group-containing polymers in the molten state	224
Cagiao, M. E., D. R. Rueda, and F. J. Baltá Calleja: Degradation of nitric acid-treated bulk polyethylene. III. Melting behaviour	626
Cebula, D. J., J. W. Goodwin, R. H. Ottewill, G. Jenkin, and J. Tabony: Small angle and quasi-elastic neutron scattering studies on polymethylmethacrylate latices in nonpolar media	555
Donald, A. M. and A. H. Windle: An electron diffraction analysis of banded structures in thermotropic polymers	793
Engeln, I. and D. Wobig: Computation of the generalized Debye functions $\delta(x, y)$ and $D(x, y)$	736
Fischer, L., U. Siemann, and W. Ruland: Structure and properties of fluorinated carbon fibers	744
— and W. Ruland: The effect of pressure crystallization on structure and properties of hot-drawn polyethylene	717
Fronk, W. and W. Wilke: Two-dimensional analysis of the SAXS of partially oriented polymers	1010
Gałecki, A. and E. Piórkowska: Statistical approach to the description of spherulite patterns. Two- and three-dimensional cases	1
Gleiter, H.: Grundzüge der Deformationsprozesse in Metallen	878
Godovsky, Yu. K. and N. P. Bessonova: Thermoelasticity of segmented polyurethanes	645
Göritz, D., J. Kemmerer, S. Kreitmeier, and R. Rossbacher: Annealing effects in high modulus polyethylene	631
Göttlicher, K., W. Fronk, and W. Wilke: Small-angle scattering of partially oriented polymers: model calculations	126
Gogolewski, S. and A. J. Pennings: Resorbable materials of poly(<i>L</i> -lactide). III. Porous materials for medical application	477
Gotoh, K., M. Iriya, A. Mitsui, and M. Tagawa: The detachment of nylon particles from quartz plate by electro-osmotic flow	805
Gupta, M. C. and J. Nambiar: Thermal degradation of polystyrene. Part 2: Chain scission in copolymers at low temperatures in air	709
Harnisch, K. and H. Muschik: Determination of the Avrami exponent of partially crystallized polymers by DSC-(DTA-) analyses	908
Hennecke, M.: Influence of a distribution of some deformation independent parameters on the orientation coefficients of the affine model	106
Hill, M. J., P. J. Barham, and A. Keller: Hairdressing shish-kebabs; comprehensive survey and theoretical discussion of overgrowth crystallization	721
Holl, B., B. Heise, and H.-G. Kilian: Microstructure and melting in fractions of polyethylene characterized with the aid of a novel folded-chain-lamella model	978
Jones, T. P. H., G. R. Mitchell, and A. H. Windle: Glassy poly(<i>p</i> -phenylene sulphide): determination of the local structure	110
Kanig, G.: Crystallization of low and high molecular materials	993
Kondo, S., T. Igarashi, T. Nakamura, and T. Okuzumi: Thermal fluctuations level inhomogeneities during gelation of polydimethylsiloxane: Observations employing the Rayleigh-Brillouin light-scattering technique	819
Korpilin, P., B. Merté, G. Fritsch, R. Tilgner, and E. Lüscher: Photoacoustic method for the measurement of the thermal diffusivity of drawn foils	312
Kröner, E.: Gemeinsamkeiten und Unterschiede im Fließ- und Deformationsverhalten von kristallinen Festkörpern und Polymerwerken	869
Krüger, J. K., M. Pietralla, and H.-G. Unruh: The elastic properties of hexatriacontane single crystals at their various phase transitions	409
Kudrna, M. and M. Mitterpachová: Orientation of polypropylene fibre. Differences between the determination of molecular orientation of the amorphous phase of a polypropylene fibre by birefringence and by the sonic method	903
Kunz, D., Angelika Thurn, and W. Burchard: Dynamic light scattering from spherical particles	635
Kurematsu, K. and M. Koishi: Temperature dependence of liquid epoxy resin impregnation through polyester non-woven fabric	834

Bikbov, T. M., V. Ya. Grinberg, A. N. Danilenko, T. S. Chaika, I. A. Vaintraub, and V. B. Tolstoguzov: Studies on gelation of soybean globulin solutions. Part 3. Investigation into thermal denaturation of soybean globulin fraction by the method of differential adiabatic scanning calorimetry: Interpretation of thermograms, the effect of protein concentration and sodium chloride	346
Birdi, K. S.: Calorimetric determination of the enthalpy of micelle formation in aqueous media	45
- V. S. Gevod, O. S. Ksenzhek, E. Stenby, and K. L. Rasmussen: Equation of state for monomolecular films of melittin at air-water interface	767
Boned, C. and J. Peyrelasse: Etude de la permittivité complexe d'ellipsoïdes dispersés dans un milieu continu. Analyses théorique et numérique	600
Brezesinski, G. und H.-D. Dörfler: Zustandsdiagramme binärer Phospholipidmischungen. 1. Berechnung des Verlaufes von DSC-Kurven binärer Mischungen auf der Grundlage bekannter Zustandsdiagramme	423
-, -, 2: Entmischungerscheinungen in ternären Phospholipid/Wasser-Systemen	427
- H. W. Meyer und H.-D. Dörfler: Kalorimetrischer und elektronenmikroskopischer Nachweis von Entmischungerscheinungen im pseudobinären System Dipalmitoyllecithin, Dipalmitoyl- <i>N</i> -methyl-kephalin	1050
Chakarov, V.: On the condensation of water on hexadecane	452
Chichos, C. and Th. Geidel: Contribution to direct measurement of double-layer potential at the oxide/electrolyte interface	947
Cornell, R. M., A. M. Posner, and J. P. Quirk: A titration study on alumina-coated rutile pigments. Part 1: Proton and hydroxyl uptake	137
-, -, -, Part 2: Dissolution processes	143
-, -, -, Part 3: The kinetics of proton uptake	150
Cortés, J., N. Picas, and Eliana Valencia: Mathematical experiments and adsorption models	929
Dábrós, T. and T. G. M. van de Ven: A direct method for studying particle deposition onto solid surfaces	694
Dörfler, H.-D. und G. Brezesinski: Einfluß der thermischen Vorgeschichte auf die Phasenumwandlung von Dipalmitoyllecithin/Wasser-Mischungen	241
und - Einfluß der Umkristallisation auf die Phasenumwandlungen von Dipalmitoyllecithin/Wasser-Mischungen . .	245
und - Einfluß des Wassers und der thermischen Vorgeschichte auf das Phasenverhalten homologer Kephalin/Wasser-Systeme	434
und W. Rettig: Kompressionsverhalten monomolekularer Cholesterin- <i>n</i> -alkylcarbonat/Stearinsäure-Mischungen . .	133
und G. Brezesinski: Phasenumwandlungerscheinungen in Lecithin/Wasser-Monohydrate. I. Einfluß des Wassers auf die Phasenumwandlungen homologer Lecithin/Wasser-Monohydrate	286
und -: Phasenumwandlungerscheinungen in Leithin/Wasser-Systemen. II. Das Zustandsdiagramm 1,2-Dipalmitoyllecithin/Wasser	329
- S. Diele und M. Diehl: Strukturuntersuchungen am System Dipalmitoyllecithin/Benzol	1031
- und G. Brezesinski: Substituenteneinflüsse auf das thermische Phasenverhalten von Phospholipid/Wasser-Systemen	417
-, -, P. Nuhn, B. Dobner und M. Gutheil: Thermisches Phasenverhalten homologer α - und β -methylverzweigtkettiger Lecithine im wassergesättigten Zweiphasengebiet	1033
Drogaris, G. and P. Weiland: Influence of HCl on the stability of liquid lamellae between two colliding bubbles in aqueous solutions on <i>n</i> -fatty acids	613
Dukhin, S. S., R. Miller, and G. Kretzschmar: On the theory of adsorption kinetics of ionic surfactants at fluid interfaces. 1. The effect of the electric double layer under quasi-equilibrium conditions on adsorption kinetics	335
Emmerling, W. M. und B. Pfannemüller: Membrantrennschichten aus monomolekularen Filmen von synthetischen Glycolipiden	677
Feldkamp, J. R., D. Swartzendruber, and I. Shainberg: Use of an automated tension cell to measure physical properties of colloidal systems	277
Fujii, H., T. Kawai, H. Nishikawa, and G. Ebert: ^{13}C - and Na-NMR studies of sodium octanoate in reversed micelles	340
Galant, S.: Formation of collagen-like structure of gel after radiation modification of gelatin	445
González-Fernandez, C. F., M. Espinosa-Jiménez, and F. González-Caballero: The effect packing density of cellulose plugs on streaming potential phenomena	688
Haller, W., F. Jost und M. J. Schwuger: Zur Adsorption von wasserlöslichen Polymeren an harten Oberflächen	176
Hayter, J. B. and J. Penfold: Determination of micelle structure and charge by neutron small-angle scattering	1022
Heath, D. and Th. F. Tadros: Influence of molecular weight and electrolyte concentration on the adsorption of lignosulphonates on polystyrene latex particles and the stability of the dispersion	49
Hoffmann, H., J. Kalus, and H. Thurn: Small angle neutron scattering measurements on micellar solutions of perfluor detergents	1043
Joos, P. and G. Bleys: Desorption from slightly soluble monolayer	1038
Kahlweit, M., E. Leßner und R. Strey: Über das Phasenverhalten ternärer Systeme des Typs $\text{H}_2\text{O} - \text{Öl} - \text{Nichtionisches Tensid}$	954
Katsanis, E. P. and E. Matijević: Properties of aluminated silica sols	255
Khrustov, Khr. I., D. R. Exerowa, and P. M. Krugljakov: Influence of the type of foam films and the type of surfactant on foam stability	265

Lenka, S., P. L. Nayak, S. B. Dash, and S. Ray: Vinyl polymerization initiated by peroxydiphosphate: IX.	40
Polymerization of acrylamide and methacrylamide by potassium peroxydiphosphate	299
Leute, U. and W. Dollhopf: High pressure dilatometry on polybutene-1	299
Maderek, E. and G. R. Strobl: Crystallization and melting of fractions of branched polyethylene. II. Dilatometric and small angle X-ray scattering study on the molecular weight dependence of isothermal crystallization	471
Marciniec, B., A. Krysztafkiewicz, and L. Domka: Wettability of silane films on silica fillers	306
Martinez-Salazar, J., A. Keller, M. E. Cagiao, D. R. Rueda, and F. J. Baltá-Calleja: Lamellar structure in melt crystallized low density polyethylene. I. Controlled study of the chlorosulfonation technique	412
Matsuo, M. and S. Hasegawa: Estimation of frequency- and time-dependence of polymer composite system by viscoelasticity in three dimensions	412
Milner, S. M.: Thermooxidativer Abbau der acrylat-ummantelten Poly(ethylenterephthalat)-Garn	319
Muschik, H. und W. Lacom: Untersuchung von Kristallisations- und Fließvorgängen bei Langzeitprüfungen von Poly-Propylen	812
Neppert, B., B. Heise, and H.-G. Kilian: Ion etching of polymers	99
Nishida, K., Y. Ando, and H. Yoshida: Interaction of 5-trifluoromethyluracil with sodium poly- α , <i>L</i> -glutamate	467
Ostrowska, J. and A. Narębska: Infrared study of hydration and association of functional groups in a perfluorinated Nafion Membrane, Part 1	93
Padhi, N. P. and B. C. Singh: Vinyl polymerization of acrylonitrile by the Ce(IV)-glucose redox system	390
Pelton, R. H. and L. H. Allen: The effects of some electrolytes on flocculation with a cationic polyacrylamide	485
Peppas, N. A. and J. L. Sinclair: Anomalous transport of penetrants in glassy polymers	404
Pérez, E., M. A. Gómez, A. Bello, and J. G. Fatou: Crystallization behaviour of polyoxetanes: poly(oxetane), poly(3,3-dimethyl-oxetane) and poly(3,3-diethyloxetane)	571
Phan Thuy, L., A. Lukaschov und J. Springer: Die Gaspermeabilität von Polybutylenterephthalat in der Umgebung der Einfriertemperatur	973
Schee, H. A. van der and G. I. Tesser: Synthetically defined oligomers of <i>L</i> -lysine as model compounds for adsorption studies	461
Shenoy, A. V. and D. R. Saini: Interpretation of flow data for multicomponent polymeric systems	846
Sobottka, J. and E. Donth: Limits of the dynamic glass transition zone in an ethylene-vinylacetate copolymer	652
Spadaro, G., E. Calderaro, and D. Acierno: The effect of the composition on the properties of γ -irradiated ethylene-vinyl alcohol copolymers. II. Mechanical properties	231
Spiess, H. W.: Molecular dynamics of solid polymers as revealed by deuteron NMR	193
Springer, H., W. Schenk, and G. Hinrichsen: Cold drawing of it-polypropylene films of different thickness	9
-, R. Neubert, F. D. Müller, and G. Hinrichsen: Orientation of fluorescent probes and polymer segments in uniaxially drawn polycarbonate and polyvinylchloride films as revealed by dichroism, fluorescence polarization and birefringence	800
Stadler, R. and W. Gronski: Effects of phase separation on network and viscoelastic properties in SBS thermoplastic elastomers	215
Suematsu, K., K. Nakamura, and J. Takeda: Synthesis of aromatic polyimines by the condensation of aromatic dialdehyde and diamine	493
Tamai, H., I. Kimura, and T. Suzawa: The electrokinetic study on the deposition of polystyrene latex onto Nylon fiber	661
Theocaris, P. S., E. A. Kontou, and G. C. Papanicolaou: The effect of moisture absorption on the thermomechanical properties of particulates	394
-: Slow-brittle-fracture transition in polymethylmethacrylate	825
Ueberreiter, K.: Multiple (partial-), main glasstransitions and tacticity of polyurethanes, polymethacrylates and styrene-copolymers measured by thermal diffusivity. Polymerization methods and tacticity. Glass with liquid phase	565
Vallance, M. A., A. S. Yeung, and S. L. Cooper: A dielectric study of the glass transition region in segmented polyetherurethane copolymers	541
Wilke, W.: Dislocations and paracrystallinity in polymers	656
Włochowicz, A. and M. Eder: The effect of TiO ₂ on the kinetics of polyamide 6 crystallization	621
Yuryev, V. P., E. E. Braudo, and V. B. Tolstoguzov: Structural study of the solutions of acidic polysaccharides. III. Evaluation of the electrostatic and nonelectrostatic contributions to the counterion activity coefficient in the presence of low-molecular salt with the same ion	210
Zhang, H. Z., K. Sekine, T. Hanai, and N. Koizumi: Dielectric observations on polystyrene microcapsules and the theoretical analysis with references to interfacial polarization	381

Colloid Science

Alsina, A., O. Valls, G. Pieroni, R. Verger, and S. Garcia: Lysis by phospholipase A ₂ of monomolecular mixed films of natural lipids	923
Amorim da Costa, A. M. and E. B. H. Santos: Structure and conformation analysis on perfluorodecanoic acid and its lithium, sodium and ammonium salts as studied by Raman spectroscopy	58
Aoki, K., N. Hayakawa, K. Noda, H. Terada, and K. Hiramatsu: Behavior of fatty acid during the incubation of bovine serum albumin. Entity of the serum albumin resistant to heat	359

Kim, H. S., C. Lamarche et A. Verdier: Etude des interactions entre un polyelectrolyte cationique de type ammonium tertiaire et une suspension aqueuse de bentonite	64
Kinoshita, T., T. Iwata, A. Takizawa, and Y. Tsujita: Ionic salt permeabilities and membrane potentials of asymmetric polypeptide membrane	933
Kiosseoglou, V. D. and P. Sherman: The influence of egg yolk lipoproteins on the rheology and stability of O/W emulsions and mayonnaise. 2. Interfacial tension-time behaviour of egg yolk lipoproteins at the groundnut oil-water interface	502
— and P. Sherman: The influence of egg yolk lipoproteins on the rheology and stability of O/W emulsions and mayonnaise. 3. The viscoelastic properties of egg yolk films at the groundnut oil-water interface	520
Kratohvil, J. P., W. P. Hsu, M. A. Jacobs, T. M. Aminabhavi, and Y. Mukunoki: Concentration-dependent aggregation patterns of conjugated bile salts in aqueous sodium chloride solutions. A comparison between sodium taurodeoxycholate and sodium taurocholate	781
Kurien, K. V., V. K. Vaidyan, and M. A. Ittyachen: Periodic precipitation of lanthanum molybdate crystals in silica gel	858
Kuroyanagi, Y., K.-Y. Kim, M. Seno, and T. Kawai: Conformational studies of copoly (N ⁵ - ω -hydroxyalkyl-L-glutamine-L-glutamic acid)s	591
Lindau, J., H.-J. König und H.-D. Dörfler: Systematisierung der Tieftemperaturmodifikationen homologer Thallium(I)-Salze aliphatischer Carbonsäuren durch ihre Mischbarkeitsbezeichnungen	236
Matijević E. and Y. Kitazawa: Heterocoagulation. VII. Interactions of rod-like β -FeOOH with spherical latex particles	527
McCoy, B.J.: Analytical solutions for diffusion-controlled adsorption kinetics with non-linear adsorption isotherms	535
McShea, Julie A. and I. C. Callaghan: Elektrokinetic potentials at gas-aqueous interface by spinning cylinder electrophoresis	757
Miller, R.: Beschreibung der Ad- und Desorptionsvorgänge bei der Kompression von löslichen Tensidsorptions-schichten	441
— and K. Lunkenheimer: On the determination of equilibrium surface tension values of surfactant solutions	585
Myška, J. and Marta Šimečková: The shape of micelles of a complex soap causing the Toms effect	171
Nishida, K., Y. Ando, and H. Kawamura: Diffusion coefficients of anticancer drugs and compounds having a similar structure at 30 °C	70
Perea-Carpio, R., F. González-Caballero, J. M. Bruque, and G. Pardo: Thermodynamics excess quantities in the adsorption of sodium alkylsulfonates at the air-solution interface	183
Plashchina, I. G., A. M. Gottlieb, E. E. Braudo, and V. B. Tolstoguzov: Creep study of high esterified gels. 2. The creep of glycerol-containing gels	672
Puggelli, Marta and Gabriella Gabrielli: Mixed monolayers of polyvinylpyridine and low-molecular-weight substances	82
— and —: Polyvinylpyridine with oleic and polymethylmethacrylate mixtures in monolayers	667
— and — Polyvinylpyridine with polyoctadecylmethacrylate and polyvinylstearate mixtures in monolayers	166
Reuther, F., P. Plietz, G. Damaschun, H.-V. Pürschel, R. Kröber, and F. Schierbaum: Structure of maltodextrin gels — a small angle X-ray scattering study	271
Sagitani, H. and S. E. Friberg: Structural changes induced by addition of a hydrocarbon to water/amphiphile mixtures	862
Scheludko, A. and V. Chakarov: On the barrier-limited condensation of water on hexadecane	776
Sjöblom, J. and M. Liljeström: Some comments on surfactant association in systems long- or short-chain alcohol — water — surfactant on the basis of viscosity measurements	251
Strenge, K. and H. Pilgrimm: The desaggregation of solid particle aggregates by ultrasonication	855
Strivens, T. A.: The viscoelastic properties of concentrated suspensions	74
Sugai, S., K. Nitta, N. Ohno, and H. Nakano: Conformational studies on poly(ethacrylic acid) in aqueous salts by potentiometric, viscometric, optical and ¹ H-NMR measurements	159
Tabony, J., A. Llor, and M. Drifford: Quasielastic neutron scattering measurements of monomer molecular motions in micellar aggregates	938
Wagner, L., M. Giesen, and H. Zahn: Histochemical localization of high-sulfur keratins with silver nitrate	365
Warner, M.: Theory of light scattering from vesicles	508

Short Communications

Couper, A., R. Newton, and C. Nunn: A simple derivation of Vonnegut's equation for the determination of interfacial tension by the spinning drop technique	371
Guo-Xi, Zhao and Zhu Bu-Yao: Spreading of mixed solution of fluorocarbon and hydrocarbon surfactants on oil	89
Kanig, G.: Application of the short-time staining for the electron microscopic investigation of the crystallization of polyethylene	373
Misra, G. S. and J. I. Khatib: Polymerization of acrylamide initiated by Ce(IV)-lactic acid redox system	188
Pathmamanoharan, C., H. de Hek, and A. Vrij: Hydrodynamical properties of polydisperse polyisobutene in cyclohexane	786

Spei, M.: Neuere Anschauungen über die Einlagerung von anionischen Tensiden in Faserkeratine	965
–: Röntgenographischer Nachweis einer mikrofibrillären Quellung in α -Keratinen	375
– und H. Thomas: Thermoanalytische Untersuchungen von Wollproteinen in der Disulfidform	968
Vonnegut, B.: Comments on the paper by D. Clausse and F. Broto entitled "Influence of a precooling on the nucleation kinetics of ice from water droplets"	370
Erratum	1059
Book Reviews	92, 191, 378, 458, 540, 708, 790
Announcements	190, 377, 619, 868, 970
Author's Index to Vol. 261 (1983)	1054
Subject Index to Vol. 261 (1983)	1056

Supplements to appear in 1983

Progress in Colloid & Polymer Science Vol. 68

"Frontiers in Colloid Science – In Memoriam Professor Dr. Bun-ichi Tamamushi".
